

Bug-A-Boo Pest Control

NOTICE TO RESIDENTS

Please be advised that our pest control technician will be on-site tomorrow to inspect and treat units as part of our scheduled pest control service.

To help ensure effective treatment, please complete the following preparation steps prior to service:

- Clear items away from baseboards and under sinks in kitchen and bathroom areas.
- Remove all items from countertops if possible.
- Secure or cover food, dishes, and utensils.
- Ensure pets are safely secured during treatment.
- Provide clear access to areas needing inspection or treatment.

IMPORTANT:

Residents should NOT use any over-the-counter sprays, foggers, powders, Raid, or other pesticides before or after treatment unless specifically directed by the pest control technician. These products can interfere with professional treatment methods and reduce effectiveness.

Thank you for your cooperation.
